I'll tell you now before I close my eyes  
I want you to know how much you mean to  
me and though  
I'll tell you now before I close my eyes  
I hope I have shown in ways that you could  
see  
Our love will always be  
But now I

Chorus:

I promise you with every breath I take  
For always forever be on time  
I promise my love will never die  
Tonight before I close my eyes, before I close  
my eyes  
I promise you

I'll tell you now before I say good night  
I wanted to say a million times before and  
though  
I tell you now, the words are hard to find  
You move me inside, at times I've even cried  
I never told you why, but now I promise you

Chorus

So lay your head down now and trust me  
When I say  
When we're as one we can't be  
separated  
I promise you with every breath I take  
For always forever be on time  
I promise my love will never die  
Tonight before I close my eyes  
I promise you
