

Taetre "When Winter Came"

Visit "[When Winter Came](#)" on [MotoLyrics.com](#)

When winter came
The trees froze and died
The frost spread its cold
Infernal storms and thunder
The snow covered the ground

I travel in the snowy night by foot
My life force is fading away
I feel like dying in this cold infernal domain

Oh, the storms they ease my pain
Yet shorten my time
I know there's nothing for me to do

The night when winter came
I travel on

As time shall pass
The snow shall grow
Storms infernalized
The wind so freezing and so cold
Feel the breath of
Lord Master 666

Your breath of ice
Takes these lives
Behold, millions cry

When winter came
