"Master Race"

Visit "[Master Race](#)" on MotoLyrics.com

one two three four - master race in outer space - they
had to leave this earthly place - all the allies and the
Russians too - this nazi shit don't do - this nazi shit
don't do - this nazi shit don't do - so we launch them to
the moon - the secret moon base was nearly complete -
so we put the plan in motion for the space age feat -
Germany was about to fall - they loaded up the rockets
and launched them all - this nazi shit don't do - this
nazi shit don't do - this nazi shit don't do - so we
launched them to the moon - master race in outer
space - they had to leave this earthly place - all the
allies and the Russians too - this nazi shit don't do - this
nazi shit don't do - this nazi shit don't do - so we
launched them to the moon - one small step for man -
one huge step for mankind (sieg heil baby) - one small
step for man - one huge step for mankind (sieg heil
baby) - this nazi shit don't do - this nazi shit don't do -
this nazi shit don't do - so we launched them to the
moon - master race in outer space - they had to leave
this earthly place - all the allies and the Russians too -
this nazi shit don't do - this nazi shit don't do - this nazi
shit don't do - so we launched them to the moon
