I like it, I like it, I like it small
I like it, I like it, I like it small
I m not on so greedios trip
I m fine with little sips
I m good with ladders, sams and piffs
Now let me go down the list
Memo production, low years
Intimate settings, living it up appeals
Dinget basements, showing ones
No expectations, wait I m not done!
I like it, I like it, I like it small
I like it, I like it, I like it small
I don t need no magnum
A snub nose would do just fine

Over long dong silver any time
And when I orgy, I capital 12
Going forth and I get overwhelmed
Don t you swear the little things
I like to try to sweep them in
I keep em tucked, in my fist
What they might be, you can only guess
And when I show my hand
You will finally understand
That I ve got big enough balls
To admit that I like it small
I like it, I like it, I like it small
I like it, I like it, I like it small
I like it, I like it, I like it small
I like it, I like it, I like it small.
