

Mudvayne "Central Disposal"

Visit "[Central Disposal](#)" on [MotoLyrics.com](#)

My perspective on life is pain
Sponge textured soul so porous I can't drain
I just absorb violations of the pledge
You swore to me your perjury
Detours the life of a child, did you?

Chicanery from you for me
Violates natural instincts in you
Dissolve does the sibling
Artificial sympathy
You braid the noose you hang me in guilt
Your guilt you blame me

Septen up the empathy broken lover in your head
Mental material mother she left and dead
Glacial feeling inherited pathetic mode of principle
Now I see the industry where you belong is killing

My deception in life was you
You bring all the pain well that I'm used to
Double vision is my view
Conditions that tear right through my mind pain, mind
pain

In my head I harness, it keeps my frigid
My body doesn't breathe, hate
Don't know how much I fuckin' hate you
Look what you've done to me
You won't leave me alone, come back no no no

Septen up the empathy broken lover in your head
Mental material mother she left and dead
Glacial feeling inherited pathetic mode of principle
Now I see the industry where you belong is killing
Bye
