

Vermin "Species"

Visit "[Species](#)" on MotoLyrics.com

Don't try to blindfold my eyes
With hundreds of lies
On before the decay
Over and over again

Technology tries to score
Just for one reason at all
Development has it's price
Look what you have done

Ignorance
Chaos, corruption I see the world fade away
When I'm travelling through the land

With hate in my mind and no hope in sight
I watch the forests die
Open your eyes and say
I can't stand it no more

People struggle to survive
Another day another life
Destruction tears you apart
Beware the extermination

SpeciesÂ...Â.....master of suicide.
