

Without Wax "Best Friend"

Visit "[Best Friend](#)" on MotoLyrics.com

I remember the days of my life
(When) We were kids strollin' round 'til the night
Ev'rything that we knew was true
It's been a while (since) I was talking to you

When it's all too much we'll meet again -
somewhere
We will hide ourselves from ugly faces somewhere only
we know-places

There you are and I never had a doubt in my mind
You're still my best friend, waiting here
And I never had a reason to cry
You're still my best friend, waiting here
And I never had a doubt in my mind

Years went by and the whole world has changed
You left our school and we all rearranged
What would have been if we ever had met
Just enter code we will find out yet

When it's all too much we'll meet again -
somewhere
We will hide ourselves from ugly faces somewhere only
we know-places

There you are and I never had a doubt in my mind
You're still my best friend, waiting here
And I never had a reason to cry
You're still my best friend, waiting here
And I never had a doubt in my mind

And when the echoes turn
And when the bridges burn
The point of no return
Somewhere only we know-places
