I'll get information and speculation for the exploration
it's true
And the expectations of the operation are very high
But the motivation for the perpetration is a botheration
right through
And the preparation of the accusation leaves me high
and dry
But I'm on the case and I'm in the chase and I won't go
back
'Cause I'm on the track, to know (to know), to know (to
know)
And the facts come in 'til my senses spin
But my mind is clear and I'm searching here
To know (to know), to know (to know), to know (to know)
There's a lot I want to know
Now the aggravation of the investigation is the
imputation of guilt
And the implication is a prevarication when they talk to
me
But my reputation for concentration and inspiration is
built
On a dedication to imagination to a high degree
But I'm on the case and I'm in the chase and I won't go
back
'Cause I'm on the track, to know (to know), to know (to
know)
And the facts come in 'til my senses spin
But my mind is clear and I'm searching here
To know (to know), to know (to know), to know (to know)
There's a lot I want to know
There's a lot I want to know
There's a lot of stuff I've got to figure out
