Life is a funny thing
Sometimes you laugh and sing
Sometimes you grumble and fuss
But either way, what do we care?
We got us

We have our ups and downs
Our share of smiles and frowns
But through it all we don't fuss
'Cause we got a special thing goin'
We got us

Some people like to go through their life single
Aw, that wouldn't suit us at all
Why sing a melody as a soliloquy
When it's more fun to be harmonizing

People they say we are, crazy the way we are
That we won't even discuss
'Cause what we got they can't smother
We'd trade our life for no other
They've only got one another
But we got us
