Every day working 9 to 5
going crazy with the overtime
monday mornin runnin late again
this cycle jus dont seem to end

its the weekend and im strapped for cash
twenty bucks i gotta make it last
sit at home when the rents overdue
turn the tellie on there aint much else to do
watchin the news
people are dyin all over the world
starvation all round
sickness abounds
takes all this to make, make me realise

ooo i have realised
problems are a part of life
times get hard God knows why
i just got to realise

no you cannot deny
no matter what life throws by
can always be worse why cry
you just got to realise

got to realise
just got to realise
that life goes on

another day yet another fight
with the folks or the gal all the time
plead my case but its never enough
oh God whys life got to be so rough

feel so lonely like nobody understands
need some air walkin through the parklands
seems the weight of the world on my head
then i stop, cant believe whats ahead
lights flash blue and red
this fire is blazin right outta control
trees burn to the ground
chaos all around

this is what it takes, to make me realise

ooo i have realised
problems are a part of life
times get hard God knows why
i just got to realise

no you cannot deny
no matter what life throws by
can always be worse why cry
you just got to realise

got to realise
just got to realise
that life goes on

and when the sun goes down
and your problems seem to have no bounds
dont stress now everythin will be alright
because, these problems will move on
and when new problems come along
realise that this is life

ooo i have realised
problems are a part of life
times get hard God knows why
i just got to realise

no you cannot deny
no matter what life throws by
can always be worse why cry
you just got to realise

got to realise
just got to realise
that life goes on
