Anthony Rother - Disco Light
The sound is disco light

close your eyes and dream about the day,
the day that was the best time in your life
hey look above the sound is disco light
and like flowers we are dancing way to sky

remember me, remember you, remember all the
others
and think about the great moments in love
yes everything will be forgiven
and past, present, future will be ok, will be ok
the sound is disco light
the sound is disco light
the sound is disco light

remember me, remember you, remember all the
others
and think about the great moments in love
yes everything will be forgiven
and past, present, future will be ok, will be ok

the sound is disco light
the sound is disco light
