In that room
Where you sit
Where you live
I know it's good to you
God, I know it's good to you
In the bed
That you lay
Where you think it eases all the pain
All the pain of what you've made

One last night
On the lonely wheel
One last taste
Of the sin we feel
One hope
Of the fear that drives us on
One last drink
Just to kill the pain
One last breath
Before I say your name
I'm giving into you
I'm giving into you

If you could
See in me
(See in me)
There is all you want
(There is all you want)
There is all you want
(There is all you want)
If you could
Just give in
It will get easier
It will get easier
(If you'd just give it would get...)

One last night
On the lonely wheel
One last taste
Of the sin we feel
One hope
Of the fear that drives us on

One last drink
Just to kill the pain
One last breath
Before I say your name
I'm giving into you
I'm giving into you

I get it
I need to fall
I get it
I need to fall
Me and who I am are so in the way
Me and who I am are so in the way

One last night
On the lonely wheel
One last taste
Of the sin we feel
One hope
Of the fear that drives us on
One last drink
Just to kill the pain
One last breath
Before I say your name
I'm giving into you
I'm giving into you

One last night
On the lonely wheel
One last breath
Before I say your name
I'm giving into you
I'm giving into you
