Injured, infected lies among the
Living, souls, twisted gaping holes
In my Shelter

Living lies untold billions
Stars explode in matter of times
Crumbling castles withered walls
Cursed by darkness to eternal light

The pathfinder leans back dead
Leaving you in loneliness
Empty mind searching soul

Insanity grips your fear
Eternity
Eternity

Plague, darkness, bladders of infection
Worn by thousand skins
Turn-coats born eternal
Chosen by their grief

Demons chase, chaos undivine
Black hearts pumps blood
Angels fallen from heaven
Abominations from hell
