Dream - the light was shining hard

And though the lie was the night

Dream - you were the light and colliding with the stars

In a way - my guide

And there light will pave the way that you go

In the light of the silver moon

Sails and wave good bye

Sails and wave good bye

Looking out from a bridge

Sails wave good bye

Behind a curtain

Activate and join

My mind devoid

Reinstate my beloved

And there light will pave the way that you

go

In the light of the silver moon

Sails and wave good bye

Sails and wave good bye
