Obsolescent fucking bitch, my tool will ensure your  
Demise, drill wielding maniac takes you by surprise.  
Power tool squealing, vibrating your head, boaring a  
hole  
To render you dead  
Internal crawling I must forfill, an unsurpressed urge to  
Kill with a drill  
Soaring through your skull, I penetrate the frontal lobe.  
Scrambling your brain, cerebral shell implodes  
An entanglement of hair matts around the bit as spiral  
of  
Flesh and lurid puss emit  
Psychotic rampage on a mission to thrill, mechanical  
Slaughter to kill with a drill  
The drill becomes a red blur as it rips into your eye.  
Spliced white matter spraying as you die  
As my drill bursts your stomach, I'm showered with  
blood  
And bile.  
Punching it back and forth, fatty clumps of tissue slide  
Down my arms
