"Just Like You"

Visit "[Just Like You](#)" on MotoLyrics.com

I knew you for such a short amount of time, but it counts
Because I'll never forget the times that we shared
But what I remember most was the smile on your face
And the innocence that came alone you know it made me care

But what I heard that night from your father he said
I want her back so bad
But what meant so much to me is when he said
I wanted her to be just like you

Well people come and go, as well as do thoughts
But the memories of you will never drift out of my head
If I could see you now then I'd say it to your face
How much I wish that you would stay and never leave

But what I heard that night from your father he said
I want her back so bad
But what meant so much to me is when he said
I wanted her to be just like you

There comes a point in time when we have to leave this world
But always say goodbye, because you never know when it'll be the last time

So what I heard that night from your father he said
I want her back so bad
But what meant so much to me is when he said
I wanted her to be just like you

Just like you

What I heard that night from your father he said
I wanted her to be just like you
I wanted her to be just like you
