You might wanna meet me before this... begins  
You might wanna keep me before I need your friends  
I might wanna like you this could be out last chance  
Might wanna get on my arm,  
Like you but I don't' know how long we have

Chorus:

Ten minutes to the summer, gotta get in before  
summer  
'Cause we all know how the summer heat changes  
things between lovers

I hope you reach out before this...  
This could be forever and should be our first kiss  
I think it's perfect ti could be my last chance  
Might wanna give you my heart  
Like you and if you wanna come take my hand

Chorus:

Ten minutes to the summer, gotta get in before  
summer  
'Cause we all know how the summer heat changes  
things between lovers

Could tell my little dramatic... the bell star ringing is  
over  
... that we had it... we had go enough  
If you're out there and waiting for love and moving  
slow  
I hope you know it's...

Chorus:

Ten minutes to the summer, gotta get in before  
summer  
'Cause we all know how the summer heat changes  
things between lovers,  
Between lovers,  
Between lovers
