The Music
"Disco"

Have you ever looked across the midnight sky?
The stars roll down, the ocean floods
To where the red sky first began
Have you ever?

And everybody better get up and listen
'Cause we got something to say to you
And everybody better get up and listen
'Cause we got something to say to you
And everybody better get up and listen
'Cause we got something to say to you

Can't dream, what you gonna do now
Can't dream, what you gonna do now, baby
Can't dream, what you gonna do now
Can't dream, what you gonna do now

Everybody better get up and listen
'Cause we got something to say to you
See all the people think that they'll be forgiven
And all the reasons that is true

Are you gonna be there?
Are you gonna be there?
Are you gonna be there?
Are you gonna be there?

Are you gonna be there, what you gonna do now?
Gonna be there, what you gonna do?
Are you gonna be there, what you gonna do now?

Can't dream, what you gonna do now
Can't dream, what you gonna do now, baby
Can't dream, what you gonna do now
Can't dream, what

Everybody better get up and listen
'Cause we got something to say to you
And everybody better get up and listen
'Cause we got something to say to you
Yeah, we got something to say to you

Are you gonna be there?
Are you gonna be there?
Are you gonna be there?
Are you gonna be there?

Are you gonna be there, what you gonna do now?
Gonna be there, what you gonna do?
Are you gonna be there, what you gonna do now?
Gonna be there, what you gonna do?
Are you gonna be there, what you gonna do now?

Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now
Gonna be there, what you gonna do now

Can't dream, what you're gonna do now
Can't dream, what you're gonna do now, baby
Can't dream, what you're gonna do now
Can't dream, what you're gonna do now
