ohhh ohh ohh
was a closing in feels like the room is spinning down,
something ain't right i got you in my system
is getting high i can't stop the fever wipe me down,
i can't lie i like, i love the symptoms
do what you want, won't even try to make it out of life
now even ..now take your time do whatever you like,
is too late go and date ..what you came here for.

chorus:

i can't get enough, now i'm making love
do shout me off just like a virus.
i can't get enough, now i'm making love
do shout me off just like a virus.

should be a crap the way that body makes a scene
you got me sick and infected with your poison,
i don't know whether somehow we could rather be
when you lose control pulls me the reason,
do what you want, won't even try to make it out of life
now even ..now take your time do whatever you like,
is too late go and date ..what you came here for, for,
for.

chorus:

i can't get enough, now i'm making love
do shout me off just like a virus.
i can't get enough, now i'm making love
do shout me off just like a virus.

is so contagious no cure for your love,
but i don't want it to stop,
every last drop is sitting me up,
but it's just what i want.

love, love, ohhh
love, in love just like a virus

[2 x chorus:]
