The subject for tonight's lecture is rythm (the beat)  
the driving force that holds our lives together  
without rythm your heart wouldn't be  
without direction  
without moves  
without shakes

and so tonught we say hip hip chin chin the rythm's  
action

the beat(11x)

and so tonight we say  
hip hip chin chin(10x)

the beat(3x)

The subject for tonight's lecture is rythm (the beat)  
the driving force that holds our lives together...  
and so tonight we say hip hip chin chin
