I remember when you called me
And you were crying

Cause you knew that she'd been lying
Even now when she says that she loves you
And you think you still love her too
Take a minute and look inside yourself

Recognize there's someone else
Well they won't change a point of you
Cause I wanna be with you
I would never let you down
No never

I will always be around
Cause it's just the way the story goes
How it ends nobody knows
Tell me what I have to do

Cause I just wanna be with you
Cause it's just the way the story goes
How it ends nobody knows
Now tell me what I have to do

Cause I just wanna be with you
I just wanna be with you
Now you're thinking 'bout the moments
That she was with you
Not about the things you went through

How you felt that you couldn't get in there
But baby I'm the one who's been here
And I'm not gonna ever leave your side
There's nothing I need to hide

Baby there's so much I feel for you
But you need to feel me too
I would never let you down
No never
I just wanna be with you
