Crime in the currency
For that abandoned wall
Oh, would you care to be in love again?
But then it got started

No one is better off
Hope is a candle-lit night
No one is meant to be
On anything afloat

We just lie awake in a storm and fog
We lie awake and imagine what we are
We hide and wait for some golden star
And hope the debt is wearing off

Fall like a domino
Lap up another mistake
Your love is killing me
Let's find a better end, and restart it

Love isn't what you want
Hold if you can't believe
Facing a loaded gun
In time we take enough of these scars
All of us, we mustn't buckle all at once

We just lie awake in a storm and fog
We lie awake and imagine what we are
We hide and wait for some golden star
And hope the debt is wearing off

We just lie awake in a storm and fog
We lie awake and imagine what we are
We hide and wait for some golden star
And hope the debt is wearing off

I just can't hold it together
I just can't hold it together
I just can't hold it together
I just can't hold it together

I just can't

I just can't hold it together
I just can't
I just can't hold it together

We just lie awake in a storm and fog
We lie awake and imagine what we are
We hide and wait for some golden star
And hope the debt is wearing off

We just lie awake in a storm and fog
We lie awake and imagine what we are
We hide and wait for some golden star, oh, oh
And hope the debt is wearing off

The devil is not the nature
That is around us, all around us
But the nature that is within us all, all
Because the devil is not the nature
That is around us, that is around us

But the nature that is within us all, within us all
Oh, the devil is not the nature that is around us, around
us
But the nature that is within us all
