From the moment we first met
I knew the love was imminent
You came just in time
You made a lifeline
And forever I'll be in your debt (debt)

My girls asked me
Where I've been so I'll
Tell them one more time again
I'm chilling with you
What else can I do?
If you want me
I have no intent

You're like sunshine
You help me get through my cloudy days
Change my perception of how love is made
I can't imagine my world without you
Sunshine
