You may be peekin' in your mailbox  
You may be waitin' for a call  
There might be only stars to sing  
If you're not waitin' there for me  
I believe you're headed for a fall

You may be starin' in your mirror  
Cryin' while you put your make-up on  
We're gonna go tonight  
To find a thing that makes it right  
What will you do when you find it's gone?

Don't put your dreams where you're preparin' to cloud  
I don't think that's what it's all about  
You can give much ire when your so above it all

I'll be waitin' here when you hit bottom  
I believe you're headed for a fall

We'll have days together in the meantime  
Autumn, twilight, winters, darkness too  
Whatever fears they hold you  
True love will enfold you  
'Cause you need me now just like I need you

Don't put your dreams where you're preparin' to cloud  
And I don't think that's what it's all about  
You can give much ire when your so above it all

I'll be waitin' here when you hit bottom  
I believe you're headed for a fall  
I believe you're headed for a fall

Don't put your dreams where you're preparin' to cloud  
I don't think that's what it's all about  
You can give much ire when your so above it all

I'll be waitin' here when you hit bottom  
I believe you're headed for a fall
