COMPUTER GEEK ANTHEM

COMPUTER GEEK ANTHEM

Gonna hack my way to the soul, Iâ€™m gona put the
revelations in code,
yea the worlds gona take my trip, my boss is gona eat
my pink slip.
Me and my computer, were gona take over the world,
me and my
computer, I love her more than my girl.
Sheâ€™s got a googolplex of gigs, sheâ€™s got mega
megabytes, sheâ€™s faster
than a thought, weâ€™ll never ever get caught.
Me and my computer, were gona take over the world,
me and my
computer, I love her more than my girl.
Our agenda is fixed, our feelings anything but mixed,
world domination
is the mark, the minnows are gona eat the shark.
Me and my computer, were gona take over the world,
me and my
computer, I love her more than my girl.
I am working on a program, that turns your thoughts
into actions, turns
your theories into facts, and your facts into
satisfactions, itâ€™ll make your
dreams come true, or make you not need sleep at all,
itâ€™ll plug the web
into your whimsy, itâ€™ll help you fly thur the fall.
Weâ€™ll all get what we deserve, in the network nerve,
the man who breeds
machine, will tell the engine what to mean, if we need a
sacrifice, let the
silicone pay the price, time canâ€™t warp cyberspace,
weâ€™ll put the time in
the place.
Me and my computer, were gona take over the world,
me and my
computer, I love her more than my girl.
