ELITE FORCES

The body politic and the soulless soul of Ayn Rand,
mated and created
the new world order superman, and so Atlas shit and
we just shrugged,
looks like it's the hardware that needs to be
debugged.

It's laissez- faire, if your a billionaire, it's heaven
cent, if you cant pay
the rent, god knows what we're gonna do. when the
devil's due comes
due.

From an ivory tower you cant see the belly of the beast,
we consider
ourselves lucky to have a job washing dishes at the
feast, you own the
world and everyone else just rents, so you can crush
the weak at their
own expense.

It's laissez- faire, if your a billionaire, it's heaven
cent, if you cant pay
the rent, god knows what we're gonna do. when the
devil's due comes
due.

Greed never sated by a trap always bated with
ambitions seeing eye dog,
you inhale pure oxygen and leave the rest choking on
your smog,
everyone else just counting on their luck, while your
profits come in
hand over fist fuck.

Uncle Sam props up his fallen, capitalistic scarecrows,
the barely walking
now barely crawling, their life savings now deposed,
but when it comes
to the milk and honey, you will not find your hors
d'oeuvre, banks full of
useless money, is about all you people deserve.
