"Followed Me Down"

Visit "[Followed Me Down](#)" on MotoLyrics.com

I'm down, never coming 'round
You were found broken in the underground
I could see the fear in her eyes
Left home, out here all alone
I was shown things that were never known
I could hear her always asking why
I know where to find my way
I can hear what the prophets say
Waiting for the enemy... to fall
Turn it on, waited too long
She's gone looking for the other song
I could see her racing to the light
I tried to hold it all inside
Couldn't hide the feeling that I'd died
There's nothing left to hurt me any more
I know where to find my way
I can hear what the prophets say
Waiting for the enemy... to fall
Lost track, crawling from the cracks
Went black, try to bring it all back
I could see the breaking of her heart
I was told I'd never grow old
Too cold, shouldn't even try to hold
I knew she was gone from the start
I know where to find my way
I can hear what the prophets say
Waiting for the enemy... to fall
