"Good For You"

Celebrate the ways to me cause I want you to
Complicate that better and it's never at you
Took out your fuse in two simple little lights
And it's oh so near you and her

Hold on to your precious little smile for me
I could never let you go if I see
Trying to charge you left
Good for you my evil one

Twist me and incite me I won't mind
Taste the sweets and Wonder and incite me
Soft lick in her eyes, anger quietly
What do I say, I just have to let this be
