you have to face the pain  
and fight against the source  
oppression made you weak  
now you can show you're strong

outpace your enemies  
show them that you believe  
now act before it's too late  
don't hesitate

show rage  
you won't be overlooked  
have the right to stay  
stand up  
they listen do they now  
it is up to you

they made you think you can't  
don't let them get you down  
their pressure's rising up  
you have to stand your ground

outpace your enemies  
show them that you believe  
now act before it's too late  
don't hesitate

show rage  
you won't be overlooked  
have the right to stay  
stand up  
they listen do they now  
it is up to you
