

## Eleventy Seven "Nostalgia"opia"

Visit "[Nostalgia"opia](#)" on [MotoLyrics.com](https://MotoLyrics.com)

We could take this road to nowhere  
In my '89 and floor it through state lines  
And we'll reach our destination  
Whatever it might be  
As long as you don't leave

Cause I don't ever want to slow this down  
Everything I've ever wanted has been found  
We could drive into the future with our memories  
Holding on to how things used to be

We could throw away our cell phones  
And only answer calls  
Coming from the stars  
We could catch the drive in movies  
And let the hours pass  
Cause nothing perfect can last

Cause I don't ever want to slow this down  
Everything I've ever wanted has been found  
We could drive into the future with our memories  
Holding on to how things used to be

Cause I don't ever want to slow this down  
Everything I've ever wanted has been found  
We could drive into the future with our memories  
Holding on to how things used to be
