I wish you
Days that never end
Warm sun
No fair weather friends
Where the thrill of something new
Is always with you

I want to hear
Later down the line
To yourself
You chose to be kind
And those regrets you had
Don't see the light

Our timing wasn't perfect
But the moments that were worth it
Don't lose their shine
In my mind

So leave no stone unturned
Get every lesson learnt
Once you try it (try it)
I know you're gonna like it
(I know you're gonna like it)
Give everything but don't give up
And if you gotta fall, fall in love
I hope you get what you want and more
I wish you
All that you wish for
All that you wish for

Bittersweet, you know what the twist is?
Your life's no longer my business
The killer is somehow
I could love you better now
I could tell you just to be yourself
There's no one like you
No one else
But that way madness lies
I realise

There's no such thing as perfect
You can bless your life or curse it
When your memories
Won't let you be

So don't you leave no stone unturned
Get every lesson learnt
Once you try it (try it)
I know you're gonna like it
(I know you're gonna like it)
Give everything but don't give up
And if you gotta fall, fall in love
I hope you get what you want and more
I wish you
All that you wish for
All that you wish for

So I say, leave no stone unturned
Get every lesson learnt
Once you try it (try it)
I know you're gonna like it
(I know you're gonna like it)
Give everything but don't give up
And if you gotta fall, fall in love
I hope you get what you want and more
I wish you
All that you wish for

Leave no stone unturned
Get every lesson learnt
Once you try it (try it)
I know you're gonna like it
(I know you're gonna like it)
Give everything but don't give up
And if you gotta fall, fall in love
I hope you get what you want and more
I wish you
All that you wish for
All that you wish for
All that you wish for
All that you wish for
