I, I never thought that I would see the day
Assuming I can see
It is shaping up to be a decent one, that is if there's a
one
I, I'd like to think that I can find your way
If you have it
It, We're not about to waste a single day, you and me
If you wanna fall in love, if you wanna fall in love you
can do it
If you wanna be with me, if you wanna see what I can
see you can do it
What will happen to me if I lose my name, or is it know
the law?
What if I don't get my chance to hug the flame, or even
know the spark
Please don't try to be a victor in the end, it's not easy
And what kind of law you think you understand, hold
my hand
If you wanna fall in love, if you wanna fall in love you
can do it
If you wanna be with me, if you wanna see what I can
see you can do it
(Guitar solo)
If you wanna fall in love, if you wanna fall in love you
can do it
If you wanna be with me, if you wanna see what I can
see you should do it
Do you want to know a secret, do you want to see the
universe
If you want it, never in a million years never in a million
singularities
