At times I think we'll never die
We'll just go on and on in this dream that we've
acquired
Cause if we learned one thing in life
It just can't be commissioned, LOVE has always been
inspired
And yet it troubles me tonight
I can't understand how love destroys so many others
But keeps the two of us alive
In honesty and giving, LOVE's the reason for our living
But whenever i see you cry, oh well I know
We've still a lot of work to go, then I hold you baby
Whenever we say goodbye
It's just a little space in time, and then we come
together
I know, everywhere I go, you will be beside me for the
next 10
I know, more than anything I know
I'll accept if you'll invite me for the next 10...
At times I think we'll never die
Now it's been ten short years of happiness that we've
empowered
They say the wonders all around us weren't done in a
day,
But we could build Rome in an hour
And if differences arise, and we don't see eye to eye
To be at peace we talk about it
Cause conversation is a science, another trade to learn
Another skill we must acquire
But whenever i see you cry, oh well I know
We've still a lot of work to go, then I hold you baby
Whenever we say goodbye
It's just a little space in time, and then we come
together
I know, everywhere I go, you will be beside me for the
next 10
I know, more than anything I know
I'll accept if you'll invite me for the next 10...
I know you are here so hold me now my lover
