Please listen I'm your conscience talking and I won't lie
to you
We're good friends your heart and I and we know
what's best for you
You love her but if you hurt her with the ones you'll hurt
the most
So take warnin' now don't you leave her or we'll haunt
you just like ghosts

So there were others before you because of pride she
lied to you
Oh but a love for you is true and I don't see no wings on
you
And you love her but if you hurt her with the ones you'll
hurt the most
So take warnin' now don't you leave her or we'll haunt
you just like ghosts
Yes there were others before you...
