I moved away when I was 18  
I was ready to run away, away for good  
Without a car, I walked alone I couldn't wait for,  
for school to start, to feel at home

Now school would start and I'd feel at home  
We met when I had one too many you were friendly  
I liked you right, you right away  
Who would've thought the first time we went out to wee  
wee  
It's still be here, we wouldn't change  
We are still here and I feel the same

You are my favorite song, you are my favorite song  
You are my favorite song you, you are my favorite, my  
favorite song

We moved a value, went back home to play your songs  
and I stayed out west close to waves  
Now count the days and I hope that someday we can  
move in the same place to live our way.  
I'll count the days to see your face

You are my favorite song, you are my favorite song  
You are my favorite song you, you are my favorite, my  
favorite song

You have my heart, just give me time to open up, and  
keep it safe.  
Keep it for good. We tried to part but everytime we  
come back right back to, to where we start as I hoped  
we would  
So keep me safe, keep me for good

You are my favorite song, you are my favorite song  
You are my favorite song you, you are my favorite, my  
favorite song

You are my favorite, my favorite song, you are my  
favorite, my favorite song
