(Don't let the ghost and the ghouls disturb you darling)
(Darling, the only ghoul in the house is you)

Let me take you on a trip tonight with the stars so bright
shining in my eyes
I need a moment just to exhale my breath before
I suppress all the shallowness in my soul

I fill the room with an empty face
Shadows paint the walls and disguise my place
With the stars shining bright in my eyes I look into the
skies
and let the darkness explode through my mind

This is now who I created
I am now separated
I'm a defect, a reject, with a noose around my neck
I live my life on the darker side

All the lies I told are now choking me but I would tell
one more Just to breathe
Cinematic thoughts of my memories tell me what to
believe tell me to leap into the unknown
This is now who I created
I am now separated
I'm a defect, a reject, with a noose around my neck
I live my life on the darker side

This is now who I created
I am now separated
I'm a defect, a reject, with a noose around my neck
I live my life on the darker side
