Here we come, you'll know us as the "other" ones,
Look how we shine, shine like black sunshine,
Look at us then look at yourself,
Take your hopes and dreams and put that shit back on
the shelf,
No more tomorrow when you're lost today,
Walk into the darkness to find your way,
Warp reality until it's upside-down,
Then you'll hear our sound and what's lost is found,
Just one,
Black sun,
Just one,
Don't run,
The cold melts,
Then come get some,

Black sunshine (X4)
Noir Soleil,
Not much left to love apart from loving what you want,
Got a head full of nothing, not even what you want,
Reality changes when you think like us,
We're the alpha underdogs, you're not like us,
Come on, you fucking waste of life,
You know what we want, don't make me say it twice,
Just one,
Black sun,
Just one,
Don't run,
The cold melts,
Then come get some,

Black sunshine (X4)
Noir Soleil,
Get down on your knees and pray,
"You're not equal and God's no sequel"
Get down on you knees and pray,
Pray away for a better day,
Black sunshine (X4)
Noir Soleil,
