Out of the flames  
Burned black from shame  
We rule again  
No need to hide  
The purest pride  
We kill again  
Whatever's lost - at any cost  
We claim our ground  
What blood may spill  
The perfect kill  
Without a sound

Annihilation's pretty sweet  
Our hearts are pure hate  
You can't stop the beat

The bastard sons / the no. 1  
Not of man but pure machine  
The antisoul / the antiblood  
Compassion's dead and so are you  
Flick the switch - the killing itch  
Now watch it burn, burn, burn  
The antisoul / the antiblood  
Not of man but pure machine

With blazing eyes and havoc cries  
We storm the world  
The 13th freeze  
Down on your knees  
We crush the world  
Our ice cold fear  
The darkest sphere  
So blessed be  
Antimatter thru  
Connects the crew  
We're your destiny
