You should do what you want to, you want to
Tell yourself over and over
You've done the best you could
God made you good

My friend don't be afraid to speak out and
Tell him no you won't go
Down that road as you've been there before
And you know it's too far from home

You've been left feeling quite tender
Your heart's an empty space
It's a hard place

My friend don't be afraid to speak out and
Tell him no you won't go
Down that road as you've been there before
And you know it's too far from home

This has been dragging on for a long time

And the one that's seeing clearly is you
It's seems to me that you've come to a crossroads
And you know what you've got to do

When morning comes
You will feel better
And here is where you'll find
Some peace of mind

My friend don't be afraid to speak out and
Tell him no you won't go
Down that road as you've been there before
And you know it's too far from home
Too far from home

You should do what you want to, you want to
You should do what you want to, you want to
