In a million miles of endless space  
You found me in a completely empty heartless place  
Now I'd be lost without your love  
Like the moon would and the stars would  
Without the heavens up above  
Your love has taught me what years of lonely never did  
So no matter how bad this cynical world gets

[Chorus]

Baby every day is better than the last one  
And every kiss, one better than the best one  
Every time you hold me baby  
Touch me, and you know you make me  
Feel the way I never felt until  
You made love real  
Yeah, you're making love real  
Making love real

Now here you are  
Where no one's been  
As close as the air is  
You breath out and I breath in  
Forever is a place I never thought I'd ever be  
But now looking in your eyes  
Baby that's where I see me in

[Chorus]

Baby every day is better than the last one  
And every kiss, one better than the best one  
Every time you hold me baby  
Touch me and you know you make me  
Feel the way I never felt until  
You made love real  
Yeah, you're making love real  
Making love real

Every day is better than the last one, ooh  
And every kiss, one better than the best one  
Every time you hold me baby  
Touch me and you know you make me  
Feel the way I never felt until

You made love real  
Yeah, we're making love real  
Making love real
