I went out to Moonstone  
To see the day dawn  
I had barely got there when my  
Loneliness had gone

The red-orange clouds had drifted  
Across the sky  
Just then the sunlight's first kiss  
Caught my eye

The sound of children playing  
And birds in the air  
The sweet smell of flowers passed by  
That were growing there

I felt my skin getting warmer  
Sunshine filled the sky  
A symphony playing for me  
Right before my eyes

(Chorus)  
Down on Moonstone  
You won't ever care  
If you ever go home  
Cuz it's supernatural there

A blanket of fog had rolled in  
'Sun became dim  
I reached for my worn out jacket  
That I barely fit in

Well maybe just one more hour  
But then again, two  
It's just that it's hard to leave when  
I'm feeling so good
