Visit "[Braille](#)" on MotoLyrics.com

Put your fingers on my hand
Watch the lines dissolve and bend
It's illusion but it feels more real than anything here

We can go there if you'd like
To the place where day is night
Where the world that we believed so real is only a play
caught in our eyes

So come with me
Come with me
Come with me he said and you came

All the rules we think we need
Well they're only doors they've built to keep
Us from finding just how good this life could really be

So come with me
Come with me
Come with me he said and you came

The world is Braille
We only use our eyes
Lets close them now and see what we can find

Come with me
Come with me
Come with me he said and I came
