

Hayley Taylor "What's Going On"

Visit "[What's Going On](#)" on MotoLyrics.com

I like what you say and what you do
I like the way you follow thru
and I know that I should speak up now
and tell you I've still got some doubts but
I like the way you look at me
and I like how easily I see

What's going on
What's going on
I've never stood in one place this long

You ask me if I feel alright
you turn back on the lights
and you know that I'm still holding back
but you keep coming round

and I like the way you look at me
I like how easily I see

What's going on
What's going on
I've never stood in one place this long
I've never been good at holding on

I've never been on this side
I've always been the one who's blind
I've always held on too tight
I've always been the jealous kind

What's going on
What's going on
I've never stood in one place this long
What's going on
What's going on
I've never been good at holding on
I never thought I could sing this song
