(Feat. Sean Kingston)

[Sean Kingston intro]

[Holly Rae]

Stepping out just a minute past midnight,
I've never seen heat rise in the moonlight,
Ninety-nine point nine on the Fahrenheit,
Mercury on the rise: climbing; climbing.
The air's toxic,
But well we won't stop,
All the girls in sarong thongs and bikini tops,
The only light burns, right off the rocks,
Stars like the diamond: shining, shining.

Getting higher like a bonfire baby, yeah we got it (we got it)
Gonna light it in the street, we gon light it, yea we just that hot.
Getting higher like a bonfire baby, yeah we got it (we got it).
Gonna want it till the sunrise; tell 'em, that we just don't stop.

Off the meter, off the meter,
We gonna shut it down We gonna burn it up
Off the meter, this night's a heater,
Catch the fever, so off the meter.
Off the meter, off the meter,
We gonna shut it down We gonna burn it up
Off the meter, this night's a heater,
Catch the fever, so off the meter
It's a dream, like I found an oasis,
The way the sky's so still like a painting,
The way the night's so real,
I can taste it, baby give me more: I'm craving, craving.
I don't want this time to end,
So hey DJ press play again and
Take us back to the beginning,
And the world keeps spinning, spinning.

Getting higher like a bonfire baby, yeah we got it (we got it)
Gonna light it in the street, we gon light it, yea we just that hot.
Getting higher like a bonfire baby, yeah we got it (we got it).
Gonna want it till the sun rise, tell 'em, that we just don't stop.

Off the meter, off the meter,
We gonna shut it down We gonna burn it up
Off the meter, this night's a heater,
Catch the fever, so off the meter.
Off the meter, off the meter,
We gonna shut it down We gonna burn it up
Off the meter, this night's a heater,
Catch the fever, so off the meter
