I can here you calling my name
Or somebody's whispering
That sounds like you

I can see you standing in the shade
The sun is glistening
And it's blinding my view

I can feel your touch on my face
I remember kissing you
For the first time

I can sense you just out of fray
And I'll be reminiscin'
For the rest of my life

Never loved anyone
I never loved anybody
But you Baby

Never been lucky baby
I never bet winners
But I'll never say never again
