Im mad as hell at myself for playing these fuckin' games. Time after time, wasting my time. When will i learn?

I need me something that is real cause im sick of playing these bullshit games.

So many times you filled my head up with these ideas that you were different. But the truth is, youre just like all the rest.

I need me something that is real cause im sick of playing these bullshit games.

Im sick of lies.  
I want the truth.  
Im sick of lies.  
I want the truth.

I need me something that is real cause im sick of playing these bullshit games.
