

Jets Overhead

"Destroy You"

Visit "[Destroy You](#)" on MotoLyrics.com

It starts in the morning
The night hawk still soaring
Bed sheets need washing
The radio talking

The last thing she said was
Don't go to bed
In silence
Silence

How we going to live this over
When we're through
Making do
How we going to live this over
When we're through
Destroy You

Through curtain spills streetlight
The slow burn of midnight
Elbows and knees touch
And somehow it seems just like

The last thing she said was
Don't go to bed
In silence
Silence

How we going to live this over
When we're through
Making do
How we going to live this over
When we're through
Destroy you
It's the easiest route to follow
Making due
Destroy you
