Devil behind you
run run away
But you got to turn and fight
to live another day
Whisper in the sawgrass
murmur in the pines
Lift your hands up and away
lift them off your eyes
Playing hide & seek
but my eyes are wide open
A voice says you're right
another says you're wrong
Well who speaks and who listens the weak or the strong
Can you feel the fear
deep within the mind
There's no loss or gain in soul
nothing real can ever die
I feel it
Playing hide & seek
but my eyes are wide open
Disintegrate or liberate
I can't think myself free
Standing by the VJ
I can hear them sing
That the truth it must be lived
and to wake up from the dream of madness
Playing hide & seek
but my eyes are wide open
