Stranger

Forgot I could see you face
I don't look anymore
Letters from the past
touch in between the pains that last

I kept holding on
are you holding on

Can you find me
See, time's the stranger
Have you found now where there was danger

Silence and miles
Long before we closed the door

And you wait so long
that the truth is still unknown
I have a different heart
different eyes see through the part

Are you holding on

Forgot I could see your face
I don't look anymore
Letters from the past
touch in between the pains that last

I kept holding on
Are you holding on

Can you find me
See, time's the stranger
Have you found now where there was danger

Silence and miles
Long before we closed the door
