Don't you think about it, don't think twice  
open your mind up tonight  
Only the sound can turn you around  
it's getting closer, can you feel it now

Oh, ooo  
Oh, ooo  
Didn't you see it coming  
.didn't you see me here  
Trembling and shaking I can feel your fear  
Don't you know I know your name  
don't you know that we're both the same  
Yea  
and it's ok  
yea

(Chorus)

Follow the tracks we left in the snow  
down through the roses of Mexico  
Over the stars that fell like rain  
just to hold you, hold you again  
Millions of people you're lost in the crowd  
it's too late now to turn around  
Will you face it or close your eyes  
will you finally realize  
There's nowhere  
left to go  
yea

(Chorus 2)

Follow the tracks we left in the snow  
down through the roses of Mexico  
Over the stars that fell like rain  
just to hold you, hold you again  
Follow the tracks we left in the snow  
down through the roses of Mexico  
Over the stars that fell like rain  
just to hold you, hold you again  
Hold you again!
